AYER'S PILLS

Excel all others as a family medicine. They are suited to every constitution, old and young, and, being sugar-coated, are agreeable to take. Purely vegetable, they leave no ill effects, but strengthen and regulate the stomach, liver, and bowels, and restore every organ to its normal function. For use home or abroad, on land or sea, these Pills

Are the Best.

"Aver's Pills have been used in my family for over thirty years. We find them an ex-cellent medicine in fevers, craptive diseases, and all bilious troubles, and seldom call a physician. They are almost the only pill used in our neighborhood."—Redmon C. Comly, Row Landing P. O., W. Feliciana

"I have been in this country eight years, and, during all this time, neither I, nor any member of my family have used any other kind of medicine than Ayer's Pills, but these we always keep at hand, and I should not know how to get along without them."— A. W. Soderberg, Lowell, Mass, "I have used Ayer's Cathartic Pills as a

Family Medicine

for 35 years, and they have always given the atmost satisfaction." — James A. Thornton,

Bloomington, Ind. "Two hones of Ayer's Pills cured me of severe headache, from which I was long a sufferer." - Emma Keyes, Hubbardstown,

LOST HIS LIFE.

A Man in Attempting to Stop a Eunaway Team is Fatally Hurt-A Victors Doz-

BONHAM, Tex., Sept. 1 .- On last Friday evening a distressing accident occurred near Ragsdale in the northern portion of the county, by which Hugh Graham, a substantial citizen, lost his life. His son's wagon was standing in a cotton field with a team hitched to it. Some children were in the wagon, which frightened the horses and they run away. In attempting to stop the horses wagon passed over Graham's body, Fiflicting wounds of which he died. The wife of Graham's son was in bed having borne a child ten days previous. She heard the confusion, and going into the yard a fleree dog caught her by one

leg, lacerating that limb terribly, On Saturday evening there was a difficulty between John Cooper and Ralph Alson at Molberry, nine unles north of town, in which Rutph was pretty badly ent and carved with a razor.

ROTTEN TO THE CORE.

Republicans Furnish Material for Democratic Campaign Documents.

The Republican Senators Who Favor the Force Bill Are Still tcheming to Secure an Extra Session-

Another Bad Break. Special to the Gazette.

Washington, Sept. 1 .- Congressman Smyser of Ohio, one of the Republican members of the committee to investigate the charges against Pension Commissioner Raum, was to-day forced to resign from the committee because he is a stockholder in the refrigerator Gen. Raum company that organized some time ago. It was stated ten days ago that the exposure would be made to-day by representative Cooper of Indiana. That gentleman created quite a sensation in the house this morning by introducing a resolution calling for the removal of Mr. Smyser from the committee, and there was

AN ANIMATED DISCUSSION. in which many of the members particlpated. The exposure was like a bombshell among the Republicans, and they hardly knew how to explain away the thing. asked to be excused from further service on the committee, and the speaker had to make a statement to Ruum refrigerator company. Congress-man Morrill regretted the thing very much, and he said to-day that if he had KNOWN IN ADVANCE

that Mr. Smyser had any stock in the company he (Morrill) would never have consented to serve on the committee. Mr. Goodnight, one of the Democratic made a very forcible statement, in which he was very fair, but f Mr. Smyser to serve on the committethen he was a stockholder in the coma pany, and he did not think the com-mittee bnd conducted the investigation in a manner to get ut THE REAL FACTS

regarding the charges that have been preferred against the commissioner of deal of unfavorable comment here and within a week the Republicans of the house bave furnished much valuable material for the Democrats to work on in making their camsaign documents. Mr. Smyser is not a candidate for re-election as he has been thrown in the same congressional district with McKinley. It is understood that the latter had arranged with the former to run his campaign out in view of the bal break of Mr. Smyser. To-day it is thought that Mr. McKinley will have to look around for another manager. The talk is that Mr. McKinley has idea of being returned good run in the new Democratic district, however, and if he can cut down the Democratic vote he will claim the nomination for governor next year at the hands of his

governor he would then hope to be the

Republican nomines for the presidency

in 1892. REED GOES TO MAINE. Things are geiting warm in Speaker Reed's district in Maine, and while it would be claiming too much to say that he is in danger of defeat, yet he has been urged to return at once. Mr. Reed will leave for Maine to-morrow. Congressmen Lodge and Greenhalge of Massachusetts and other of 1228 bales. The Southern consumpprominent Republicans have been stumping the district for more than two weeks.

Messrs. Reed and McKinley are both gain over last year of 6719 bales. The Messrs. Reed and McKinley are both gain over last to speak at the same meeting in the district this week. The speaker did not iutend to go to Maine until after the adournment of congress, but it has been epresented to him that if he does hasten home and belp straighten out matters at Saco where the election laws of the state have not been complied with, he is liable to lose a large vote there, which would endanger his election. As it is, the Democrats expect to have a very good case for making a contest for his sent before the next house, and the advantage has been given out by the attempt of the Republican managers in the district to disfranchise a number of Democrats at Bidde-

Many of the members of the house are leaving the city. It is very doubtful whether there will be a quorum on hand when the vote is taken on the Breckinridge contested election case.

Will Try to Bulldoze Harrison. Special to the Gazette.

WASHINGTON, Sept. 1 .- It leaked out this morning that the Republican sena-tors who are behind the force bill intend to advocate a policy of bulldozing towards the president if they can't secure the call of an extra session, which they want. The president has already re ceived an intimation, politely but energetically expressed, that it will be decidedly to his own advantage to make the cull immediately after the election, and If he does not see fit to take the hint the backers of the force bill are prepared to make their language, as well as their meaning, much plainer. In brief, they stand ready to tell the president that he must either issue the call for an extra session or reconcile himself in advance to defeat in the nominating convention of 1892; or, as Eastern senator suphem-

istically described the programme: "The president must be made to realize that the Federal election bill is an indispensable measure to be passed by the Republicans in congress, and that its essential principle, the right of free ballot and a fair count, is more important as a rallying cry than any protective tariff idea which become a part of the party's policy through force of circum-He should be glad to realize, if he does not already recognize, the fact, that to this measure rather than the McKinley bill the party must look for its

An Agreement on the River and Harbor Bill.

victory in fall."

WASHINGTON, Sept. 1 .- After B week's steady work the conferes on the river and harbor bill have reached an agreement and signed their report. The changes made in the bill by the senate were generally agreed to, but in numerous cases the appropriation was reduced. Among the Items in the bill where changes were made are as follows: Appropriation for work on the Mississippi river, under commission, was reduced from \$500,000 to \$320,000, and appropriations for various harbors was limited to \$600,000, and for work at the head of Atschafalya and mouth of Red river to \$250,000. The appropriation of \$179,650 for the purchase of the Buffulo bayou ship canal in Texas was stricken out, leaving, the amount to be paid discretionary in the board to be appointed for

that purpose. Section 6, forbidding obstruction of channels of navigable rivers, and providing punishment therefor was stricken out, and senate bill 88 as amended by the house committee on rivers and harbors covering the ground more thoroughly inserted, adding ten sections to the bill as it passed. The house bill approprinted \$19,498,445, as it passed the senate \$25,786,853, as agreed to in the conference \$24,981,295.

COTTON STATISTICS.

Official Peport for the United States for the Commercial Year Closing with August-Largest Crop Ever Grown-

NEW ORLEANS, LA., Sept. 1 .- The cotton exchange issued to-day an officia; report of the cotton crop of the United States for the commercial year ending with the close of August, 1890, made up by Secretary Hester. The report states the total crop amounts to 7,331,322 bales, exceeding the largest crop ever grown by 265,489 bales, and the crop of last year by 373,082 bales. Every point throughout the cotton beit has been thoroughly investigated Mr. Smyser very promptly by telegraphic and other information from the exchanges, railroad officials and mill owners. It has been checked and rechecked, so that clear away any suspicion in the mind of the statements will bear the closest the public tent he knew in advance that scrutiny. The report comments the Ohio member was interested in the on the different methods in vogue for computing the cotton crop. It objects to the way in which the cottom movement of Brunswick, Ga., is now counted and suggests cotton exchanges; insists that the Brunswick figures be made up at some other important cotton ports. It also objects to the method of deducting cotton consumed in Southern members of the investigating committee, cotton ports from the totals of cotton shipped across the Mississippi and Potomae rivers. It claims that such at the same time he said that he thought system is not only misleading, but that it was an act of great impropriety erroneously decreases the figures of Northern consumption. The leading feature of the report is the census of Southern mills. Secretary Hester has obtained reports from every mill in the South and claims that his statement does not contain a single element of estimate. The information under this heading is quite elaborate, pensions. This affair has caused a great | embracing a larger field relating to the consumption of cotton in the South and its progress than has yet been compiled. The total consumption of the South for the past year is reported at 546,365 bales, against 481,235 bales last year The number of mills in operation is 270, with 165,190 spindles. Thirty-nine new mills, with 241,864 spindles, have commenced work during the year, and fifteen new mills have been completed, and will be at work this fall. Forty-four nre idie, n which expect mills to start of up again at an early date. The total cumber of mills in the South is now 336 with 40,819 looms rank 1, 819,291 spinto congress. He is hoping to make a dies. Secretary Hester says the increase spindles during the past r is equivlant to hearly of yea,r is equivlant to nearly one half of the entire number reported in the south by the census of 1880. The census of that year showed 164 mills own party, and should he be elected with 561,360 spindles. The gain within the past ten years has been 172 mills with 1,226,477 spindles, the increase in the number of bales of cotton consumed having been 357,615, or more than 189 per cent.

With reference to the cotton movement for the year, the statement makes the net receipts at delivery ports 5,857,-174, a gain over last year of 306,829 bales; over land direct to northern mills, tion, exclusive of 30,217 bales taken a gain over last year of 373,072 bales. Foreign exports, including 55,491 bales to Canada, were 495,531, a gain over last year of 165,253 bales. The takings last year of 165,253 bales. of cotton during the year for consump-2,346,152 bales. Of this 1,799,258 bales were to Northern spinners, against 1,985,979 last season.

This shows an increase of only 13,279 bales against an increase in the South of nearly 68,000 bales. Not only is the crop of 1889-90 the largest crop ever produced, but it has moved off with unexampled rapidity and brought full prices throughout the year, netting to the farming interest a handsome surplus. One of the curious features of this year's movement was the shipment of more than 2000 bales of American cotton through Ontario via the Cauadian Pacific railway to Japan. Fifty bales were also shipped to Japan from port of New York.

A great spring medicine is P. P. P. the greatest blood purifier in the world, as hosts of people in this city, where it is manufactured can testify. For sale by L. M. Whitsitt & Co.

TEXAS AND TEXANS.

HOW TEXAS FARES.

Appropriations for Texas Rivers and Barbors as the Bill Becomes a Law.

Provision for the Survey of Numerous Rivers President Barrison Pavors the Edmunds Resolution.

WHAT WILL CONGRESS DO. Erecial to the Gazette.

WASHINGTON, Aug. 30,-Leading Republicans in both houses say there is little prospect of congress taking a recess, and they are not in favor of having an extra session. The president is opposed to calling extra sessions on general principles except in cases of great emergency. The president, however, tactily consents to Edmunds' resolution for a recess, as an extra session would thus be accomplished without his intervention. Of course the only possible reason for an extra session that the Republicans would thus be enabled to consider the odious force ball. Of course the Edmunds resolution will be opposed by the Democrats. The closing of busi-ness on the 10th of September would mean that the senate bill remain in the hands of a conference committee until November, for it cannot possibly be ready for an agree-ment within three weeks. Mr. Mills,

bill in unimportant particulars to the views of the house so as to expedite its consideration in the conference committee. TEXAS RIVERS AND HARBORS. So far as the Texas rivers and harbors are concerned the and conference committee have agreed on the items as passed by the senate. The most important of course is Galveston. The net for this harbor will read: Improving the entrance to Galveston harbor, Texas. Continning the improvement, \$500,000 provided that contracts may be entered iuto for such materials and work as may be necessary to carry out the plan contained in the report of the chief of en-

tween Canton and Roddy, and from Athens to Wolton. Star service between Roddy and Prairieville has been discontinued. Texas postmasters commissioned: Henry Staylor, Cookville; Gideon M. Holton,

Headsville. A new office has been established at Crozier, Young county.

Mrs. John F. Elliott of Dullas is visiting Mrs. M. C. Wilson for a few weeks.

THE SECOND INVASION.

Northern Men and Money Conquering The Cereal Producing Soil-

Boston Herald, Aug. 13. Commissioner T. A. Wilkinson of the department of immigration at Texas served three years in the Union army during the rebellion as a member of the Wisconsin volunteer infautry. Speaking of Texas, he says that Northern plack and enterprise are doing much to develope the productive lands there. He is here in charge of an exhibit of the products of Texas, which is sent out by the Fort Worth and Rio Grande railway company, with a view of making known to the world the many inviting features and resources to be found in its tributary country. Two years ago he took an exhibit car to Columbus, O.; last year he had a magnificent exhibit car at Milwankee, Wis., during the G. A. R. encampment, and this year his indefatigable efforts have provoked such a spirit of emulation that three cars filled with sample products are here in Boston from the great state of Texas, The contents of this car will be a revelation to our Northern people. that all the products of the North can be raised in Southwestern Texas, and at the same time cotton and many other Southern products can be produced, Its high altitude and South-ern latitude combined insure healthful, cool summers and mild and beautiful winters. Its close proximity to the gulf gives it exemption from drouth, common to other districts of the same longitude farther north. As a proof of this, Mr. Wilkinson cites the fact that fine groves of the celebrated pecan trees flourish, also live oak and mesquit timber, 100 miles west of where a stick can be found in Western Da-

kota. Nebraska or Western Kausas. Sheep, cattle, and, in fact, all kinds of

stock, live the year round on the natural

range, with no shelter whatever. The wool resources of the country alone will

uitimately render it self sustaining. "Benjamin Butler told the truth," snys Mr. Wilkinson, "when he said that the sheep raisers of Western Texas could stand the re-duction of the teriff on wool better than those of the East. Not finding room enough in hortfeultural hall, and partly owing to the fact that Mr. Wilkinson's car is a complete exhibit in itself, he invites the public to visit his magnificent and convincing display, which is now side-tracked on the Boston and Albany track, near Mechanics' hall, and will be open from 9 a. m. to 12 m., and from 1 to 4 p. m. each day. It will remain at its present place for ten days

Mrs. Laura J. Eisenbuth of North Dakota

Democratic Nominee for Superintendent State Instruction-

The coming election in North Dakota attracts much attention owing to the fact that a lady has been selected as the Democratic candidate for superintendent of public instruction. This is a step of the Democratic lenders in the Northwest ahead of all parties and is attracting the attention of the whole nation thitherward. Under the constitution of that state all women of legal residence and upwards of twenty-one years of age, can vote for any school officer or upon any school question

and are "eligible to any school office." Mrs. Laura J. Eisenhuth who has thus been honored, was born in Canada in 1858, her maiden name being Kelley. When she was two years old her parents removed to Iowa, where she was educated in the best institutions of learning. She was for eleven years a teacher in the Iowa public schools and holds a state teachers certificate from the authorities of that state. About three years ago she came to Carrington, Foster county, N. D., as the bride of Willis H. B. Eisenbuth. In 1889 she was elected county school superintendent of Foster county, and last June she was re-elected by an overwhelming majority, carrying eleven out of thirteen precincts. She is a woman of fascinating presence, tall and fair, an enthusiastic educator, a formed the department of state that charming conversationalist, and, above there is no provision of law exempting all, a woman of high executive and or-

New Mexico and Arizona.

WASHINGTON, Sept. 1 .- At a meeting of the house committee on territories to. day the subject of the consideration of the bills for the admission of New Mexico and Arizona into the Union being under discussion, the preamble and resolution in regard to the matter drawn up by Representative Mansur of Missouri was unanimously adopted. The resolution nuthorizes the committee on territories to send a sub-committee of seven members to New Mexico and Arizona with authority to inquire into the social. educational, financial and moral conditions existing in the territories and report whether the territories in justice to themselves and their relations to the states of the United States are prepared for brotherhood or not.

TO LOOK AFTER THE MORMONS. The resolution also authorizes the subcommittee on their return trip to visit such localities in Utah as they may deem proper, and there take a report of the testimony upon questions of privance and extent or decadence of doctrines and practices of plural and celestial marringes as taught by 'the heads of the Mormon church. The committee is required to make its report at the second session of the present congress.

CHAUNCY M. DEPEW

He will Give the Arbitrators a Chance to Question Him.

The Failure of the Strike Destroys the Power of the Knights of Labor As an Organization.

The Board Can't Reinstate the Men Discharged or Discharge the Men Employed to Fill the Strikers Places.

ON HIS WAY HOME. Special to the Gazette.

NEW YORK, Aug. 31 .- A special from London to the World says: Mr. Chauncey Depew is here again, homeward bound. He expects to arrive in New York in time to tell the state board of arbitration that he knows positively nothing about the Central strike or the causes which led to it, provided the board is disposed to call him as a witness. Depew declares decidedly he will not discuss his opinions with the board, though he is quite willing to tell them what tew facts he knows about the difficulty. He says that his latest official information is that the strike is

DEAD AND BURIED. He says further that while he has not looked closely into the law govern-ing the state arbitrators, he has no doubt that they have the right to inquire into the cause of the strike if they see fit to do so; . ut they have no powers to impose any obligations on the Central road as the result of their inquiry. They cannot compel the railroad to reinstate the men discharged, or to discharge the men employed in the place of the strikers. Mr. Depew does not think that any inquiry by a purely political board, who will depend on getting on the popular side of the dispute in order to hold their places, promises well for enreful consideration and judicial decision on the interests of the Central railway company or any other corporation. He says that any board possessing

JUDICIAL POWER TO ARBITRATE between a large corporation and its employes, should be as carefully selected and as far removed from popular political pressure as is a court of appeals or even more so. Mr. Depew believes that the failure of this strike utterly destroys the power of the Knights of Labor as an organization, while it strengthens the hands of trades unions and the Federation of Labor.

"So long as labor disputes are con-fined to trades unlons," said Mr. De-pew, "it is comparatively easier to reach some agreement because then you can deal with the workmen who understand the trade and know what they are talking about. In dealing with a Knights of Labor committee you could make no more impression upon them than you could

when rolling it around in your hand. They did not understand what you were talking about. The chairman of the Knights committee which called upon me once to discuss a very intricate question of railway management was a cab driver. I knew of another case in which a serious strike among glass blowers was ordered by a tailor who happened to be the Knights' master workman in the district where the trouble arose. ' Depew said further that he had sound

assurances from home that the only dissension among the Republicans on the McKinley bill was on Blaine's reciprocity policy, and that the majority were rapidly coming round to Mr. Blaine's TO LOOK AFTER THE KNIGHTS! INTERESTS.

Special to the Gazette. NEW YORK, Aug. 31 .- Gen. Roger A. Pryor was vesterday retained by the general executive board of the Knights of Labor to look after its interests in the investigation before the state board of mediation and arbitration which begins its session on Tuesday.

Investigating Railway Ticket Brokerage. KANSAS CITY, Mo., Aug. 30 .- The railroad commissioners of Missouri and Kausas to-day began a joint investigation into the business of railway ticket brokerage. It is said this action is taken by auggestions of the interstate commerce commission which definitely outlined the legality of the scalpers business.

PANAMA CANAL.

Its Prospects Frightening- An Extension the Contract With Mod fications-

PANAMA, Sept. 1 .- The prospects of the Panama canal are definitely brightening, and in the best informed circles here the matter is regarded as practically concluded, although a committee the senate is still engaged in studying the proposals of Mr. and preparing the draft Wyse, and preparing the draft of a bill to authorize the executive to come to terms with him upon the basis of his proposals.

The following cablegram from official sources in Bogota has been published in

Panama: The president of the republic has recommended to congress the proposal of Mr. Wyse, which is as follows: An extension of the contract for eight years longer, work to be commenced not later than a year and a half after approval. The government will concede 10,000 acres of land that may be necessary for carrying out the scheme and settle all expeuses. The company will pay the Colombian government 12,000,000 francs in eight annual installments of 1,500,000 francs each, and 5,000,000 francs worth of free privileged shares. The company will also contribute 30,000 france mouthly for military protection of the transit, all freight of Colombian products passing over the Panama railroad to be carried at half the tariff rates.

What is Scrofula

It is that impurity in the blood, which, accumuisting in the glands of the neck, produces unsightly lumps or swellings; which causes painful running sores on the arms, legs, or feet; which developes ulcers in the eyes, curs, or nose, often eausing blindness or deafness; which is the origin of pimples, cancerous growths, or many other manifestations usually ascribed to "humors." It is a more formidable enemy than consumption or cancer alone, for scrofula combines the worst possible features of both. Being the most ancient, It is the most general of all diseases or affections, for very few persons are entirely free from it. How can it be cured? By taking Hood's Sarsa narilla, which, by the cures it has accommished often when other medicines have failed, has proven itself to be a potent and peculiar medicine for this disease. For all affections of the blood Hood's Sarsaparilla's unequalled, and some of the cures it has effected are really wonderful. If you suffer from scrofula in any of its various forms, be sure to give Hood's Sarsaparilla a trial.
